Wofford College Daily Announcements - March 8, 2001

- Development Office Welcomes Bobby Couch
- Senior Salute Today
- Convocation with Scott Neely - Thursday, March 15
- Anti-virus Update from Jim Sawyers

Development Office Welcomes Bobby Couch

We are pleased to welcome James Robert "Bobby" Couch back to Wofford as a new member of the development staff as Major Gifts Officer. Bobby is a 1989 graduate of Wofford who joins us after being the chief development officer for the Pamplin School of Business at Virginia Tech. Prior to that assignment, Bobby was a major gifts officer with the Greenville Hospital Foundation in Greenville, SC. Bobby and his wife Christi have three sons (under the age of 7), and are expecting a fourth later this summer. As we continue to seek to grow the constituency of major donors to the college, Bobby will be joining Ed Story, Smith Patterson, Lisa DeFreitas and me in visiting with alumni and other friends, particularly with a view to another major campaign effort associated with the college's sesquicentennial celebration in 2004. We are extraordinarily fortunate to be able to attract Bobby to return to Wofford, and he brings valuable experience enabling him to be an effective development officer immediately. You may welcome Bobby via email at couchjr@wofford.edu and you will certainly be seeing him around.

Convocation with Scott Neely - Thursday, March 15

Scott Neely, Class of 2000 and Wofford's 14th Presidential Scholar, will speak at a convocation Thursday, March 15, in Leonard Auditorium. The address is timed for the release that day of Scott's book, *A Good Road to Walk*, reflections upon his travels in search of "saints" in Third World Nations. Following convocation, free copies of the book will be available in the Burwell dining hall during lunch, and Scott will be available to sign copies.

Later in the day, in 103 Olin Building at 3:15 p.m., Scott will be joined by a friend from New York, India, and the world, Seth Castleman, knowledgeable participant in Buddhist monasticism, and by Kris Neely, 16th Presidential Scholar (communicating by phone), for a panel discussion on spirituality, meditation, monasticism, in the Religion 340 seminar, moderated by President Dunlap, followed by a presentation on Islam in America from librarian Ibrahim Hanif.

Anti-virus Update from Jim Sawyers

Over the past few weeks, IT Services has been rolling out the newest version of Symantec's Norton Anti-Virus Corporate edition. We are pretty confident that we got to every qualifying PC on campus but we wanted to send this e-mail out just to make sure.

The new anti-virus software will periodically pick up the latest virus definition file available and will automatically scan files accessed from a floppy, email, etc.

We ask that you check the lower right hand corner of your Windows desktop (next to the clock) and see if there is a little golden shield icon. Having this shield there means that you DO have this software installed. If you don't think you see the little golden shield there you can also check to see if it is installed by doing the following:

Press START
Select PROGRAMS

- Then look in the list and check to see whether or not you see the program group labeled "Norton Antivirus Corporate Edition". It will read exactly like that. If you have something else like "Norton Scanner" or "McAfee Virus Scanner" then you do NOT have the proper software installed.

If you are pretty sure that you do NOT have Norton Antivirus Corporate Edition installed on your computer then please e-mail me at sawyersjc@wofford.edu and put a subject as 'Need Antivirus' and somewhere in the body of the message tell me where you are located and your phone number. Doing so will aid me in formulating a schedule for coming around and checking on the people that may have been missed in the software rollout.

may have been missed in the software rollout.

I would also like to add that having this software doesn't make you impervious to new strands of computer viruses. Thousands of new viruses are created each year. It would be nearly impossible to keep everyone up to date on each new virus out there and what to watch for. You are going to have to take a pro-active stance towards protecting yourself for viruses that there is no current protection for. Therefore, if you want to ensure that you run a minimal risk for getting a virus we recommend the following tips:

- Do not open attachments from people that you do not know
- Most viruses hide in files with .exe and .vbs extensions so be wary of any attachments ending with these three letters
- As with the Anna Kournikova virus, the virus looks like a picture (mypicture.jpg) but the real extension (.vbs) is hidden in Windows and you don't know what you are really opening until it may be too late. Be careful and check to make sure the file isn't named something like wofford.jpg.vbs. A file with that naming scheme is most likely a virus and should be deleted immediately.
- If you want to open an attachment, scan it with Norton Anti-Virus Corporate Edition first to make sure it's clean
- If you find an infected attachment, delete it immediately and do not e-mail it to a friend.

As a side note, we will be coming around to all computers within the next week or so to run an audit to check and see which computers will qualify for future operating system and administrative software upgrades. If you would like to be present, although you need not be, please contact either myself or Matt Putnam at putnammm@wofford.edu and let us know when would be a good time to come by. This audit is run from a command line and typically takes around 10-20 seconds to scan so we will not be in the way for more than a minute or two.

Thank you for your help in this matter. If you have any questions you can write me an e-mail or call me at extension #4277.

Sincerely,
Jim Sawyers
